

Abdelhamid HENNI

Senior Software Engineer - Fullstack JavaScript

Paris, France | FR / EN

henni.abdelhamid@gmail.com | ahenni.eu | linkedin.com/in/abdelhamid-henni-0108b971/

Profile

- Software engineer with 12+ years of experience. I help product teams deliver business impact through reusable components, front/back architecture, tracking, and CI/CD execution.

Experience

- 2022 - Present | CANAL+ Group (mission): product and tracking features on critical journeys.
- Built reusable components to improve delivery speed and UI consistency.
- 2017 - 2022 | Societe Generale: fullstack business apps with strong reliability and performance.
- Stack: React, TypeScript, NestJS, Supabase Auth/DB, Amplitude, Tealium, Didomi.

AI & Data Projects

- Personal local AI automation project: n8n orchestration with local model execution via Ollama.
- OpenAI API integrations to automate repetitive workflows and enrich operations.
- Tracking and analytics stack: Amplitude, Tealium, Didomi (consent and data governance).

Skills

- Frontend: React, Angular, Tailwind CSS, Vite, Vitest, TypeScript, DI.
- Backend: Node.js, Express, NestJS, Supabase (Auth & DB), PostgreSQL, MongoDB, Elasticsearch.
- DevOps/Security: GitLab CI, GitHub Actions, OpenShift, AWS, OWASP ZAP, Linux, Nginx.

Strengths

- Ability to turn business needs into robust, maintainable technical solutions.
- Clear collaboration with Product, Design, and engineering teams in demanding contexts.
- Quality culture: testing, observability, accessibility, and continuous improvement.
